

Our Famous GOOF PROOF NO Questions Asked Warranty

Scale	Functions	Function Rating	Continuous/Peak
НО	8	100 mA	1.3 /2.0 Amp

21-Pin Connector

Dimensions: 1.28" x .69" x .22" or 32.5mm x 17.5mm x 5.6mm

Main Features of this Decoder

- **Steam Sounds** this decoder includes light, medium, heavy, Reading and Northern Railroad #425, and <u>5 Narrow Gauge locomotive</u> sound chuff sets.
- <u>True CD Quality Audio</u> Enjoy rich, full audio with true to life 16bit 44,100Hz sounds. No one else even comes close.
- <u>User Calibration of Proto Chuff</u> (patent pending) for dynamic chuff intensity, volume, and tone for realistic operation of light and heavy loads to match your layout!
- Back EMF Load Compensation Back EMF Load Compensation for superior slow speed control in excellent synchronization with the chuffs
- Tons of Sounds! 45+ different bells and 60+ whistles plus much more
- <u>Airwire™ Compatible</u> fully compatible with Airwire™ operation.
- <u>Audio Asisst</u>TM (Patent Pending) With Audio Assist[™] the decoder comes alive and talks you through configuring sounds and volumes.
- Optimized for 8Ω Speakers Specifically optimized for 8Ω speakers.

Version 4

<u>Take a listen and check out our video tutorials:</u> http://www.tcsdcc.com/public_html/WOWSound.php

Operation and Button Mappings

In the TCS WOWSound decoders we have reinvented the way we think about model locomotive operation to reflect that of the prototype. Currently, most model trains operate without a brake seperate from the throttle speed. We call this kind of operation "Traditional" because your locomotive operates like a slot car (directly controlled by throttle). With our new default "Prototype" operation users are expected to apply and release brakes seperately from adjusting the throttle just like the real thing, though the brakes will automatically release when the throttle is increased.

All of the sounds in this decoder can be remapped to any function except the toggle between light and sound mode, and the Audio AssistTM mapping.

Function Button	Feature		
0	Generator		
1	Bell		
2	Whistle - Long Toot		
3	Whistle - Short Toot		
4	Whistle - Pre-Recorded Quill		
5	Cylinder Cocks		
6	Brake Release		
7	Apply Brakes (20% Per Press)		
8	1x Press: Mute/Unmute 2x Presses: Toggle between light and sound mode 4x Presses: Enter Audio Assist		
9	Rotate Whistle (Switch Whistle Set)		
10	Johnson Bar Down		
11	Johnson Bar Up		
12	Injector		
13	Air Pump		
14	Blower		
15	Idling Sounds		
16	Horn		
17	Shovelling		
18	Blow Down		

NOTE: Functions 19-28 are supported but there are no sounds mapped to these functions by default.

MOTOR CONTROL

Speed Graph					
CV 2	0	Start Volts Set the voltage when the throttle is first applied.			
CV 6	0	Mid Volts Set the voltage when the throttle is at midpoint.			
CV 5	0	Top Volts Set the voltage when the throttle is at full speed.			
Momei	Momentum				
CV 3	32	Acceleration Larger values add time to each speed step.			
CV 4	96	Deceleration Larger values add time to each speed step.			
CV 23	0	*Acceleration Adjustment when in Consist			
CV 24	0	*Deceleration Adjustment when in Consist			

*Values above 128 increase the adjustment * Values below 128 decrease the adjustment

Motor Trim

CV 66	128	Forward Trim	Values above 128 increase speed,
CV 95	128	Reverse Trim	values below 128 decrease speed.

Brake Rate With each brake application the decoder moves to the next brake rate.

CV 183	32	Brake Rate 1 (1 Press)	
CV 184 26 Brake R		Brake Rate 2 (2 Presses)	
CV 185	16	Brake Rate 3 (3 Presses)	
CV 186	8	Brake Rate 4 (4 Presses)	
CV 187	3	Brake Rate 5 (5 Presses)	

The larger the number the longer it will take to come to a complete stop.

18	Cylinder Cocks Auto Turn On Time	1	0		
19	User Options CV	56	248		
20	Articulated Chuff Slip Rate	0	240		
21	Audio Auto Shut-Off Time	4	176		

Sound and Light Mode Operation

To maximize the amount of control you have with the limited number of function buttons we have created two distinct control modes: Sound Mode and Light Mode. In Sound Mode the function buttons will play the sound mapped to them without effecting any lights mapped to the same function button. In Light Mode the function button will perform any lighting operation that is mapped to it, but it won't effect the sounds being played.

For certain applications it may be desirable to play a sound at the same time a lighting function changes (for instance illuminating the headlight when the generator turns on). To setup your own dual-mode functions visit the WOWSound section of the TCS website for more information.

WARRANTY PROCEDURE: All decoders are covered by a one year goof proof, no questions asked warranty. Please return in a small box.

You MUST register the failed decoder on our web site at www.tcsdcc.com. Follow the instruction on the web site before returning any decoders to TCS.

Important: For maximum enjoyment of the dynamic proto chuff feature of this decoder we highly recommend that you calibrate the decoder using Audio Assist. This is one of the most important features of this decoder! You will love the results. See the video tutorial on the TCS web site!

Wiring Diagram

Install with a TCS Motherboard to add Keep-Alive™ functionality!

NOTE: When plugging in insert the pins through the circuit board and UP into the plug. Do not plug in with the black plastic plug facing down.

This decoder is Patriotic compliant, use the Additional Options menu in Audio Assist™ to find out more.

Speaker Selection

- 1W minimum power rating
- · Speaker enclosures greatly increase speaker performance

WOWSound Upgrade

Older versions of WOWSound can be upgraded to the current version.

Visit www.tcsdcc.com for more information

Video Tutorials

Important! First time users should view our instructional videos in the WOWSound section of the TCS website for a full range of information on using this decoder.

Compatible with NMRA DCC standards.
